

### **Abstract for Data Collection Activity**

Each member of the group will submit an abstract for the group data collection activity. The group can decide which abstract to include on the poster that results from this activity.

Remember: An abstract generally contains information about why the authors are interested in this area, project goals and objectives, how the study was conducted, important observations, key findings, and conclusions. Your abstract word count needs to be in the range of 250-300 words. For ease in grading, please indicate your word count.
