

### **Homework: Profile Faculty Members**

Find two faculty members whose research you find interesting. One should be from your major discipline department and one from outside your major discipline department. List these faculty members and their credentials.

- Describe what they do (Do not copy and paste material from their websites directly)
- What do you find interesting about their work
- Provide at least one question you might ask them about their research if you were given a chance.

During your search, keep track of all faculty web sites you looked at even those that did not make your list. Present this additional list on a separate page.
